COMMON CENTS · FINANCIAL FORECAST

Jordan's next 12 months

Warehouse supervisor, hours recently cut

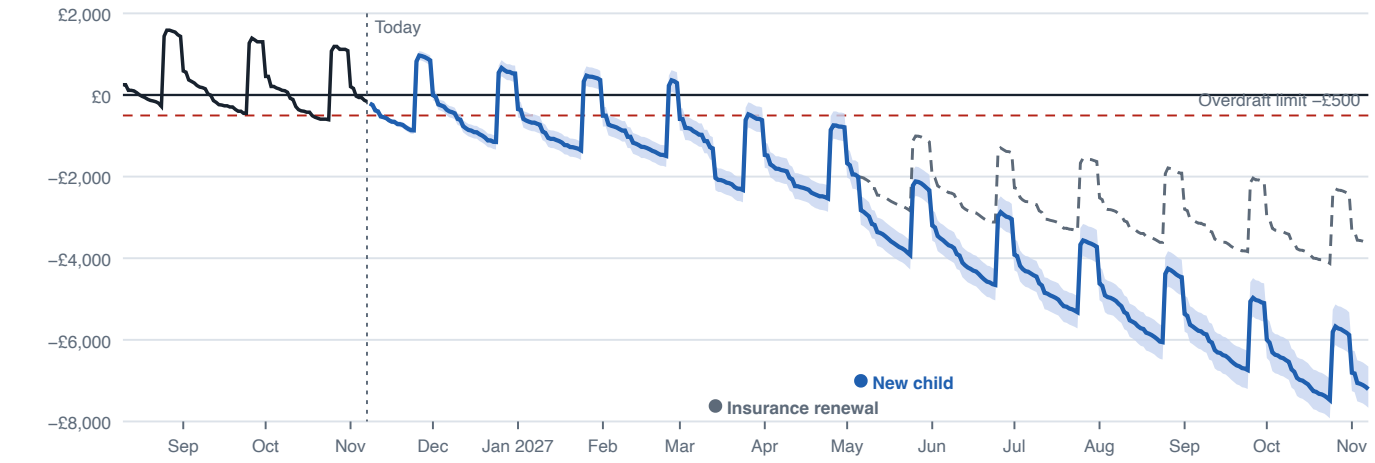

Prepared 07 November 2026
Based on 18 months of transactions
1,000 simulated futures

If your pay stopped for 2 months from next month, your lowest expected balance would be -£4,932, with a 100% chance of going past your overdraft.

Answer to your biggest worry: Job security

BALANCE TODAY	IN 30 DAYS	IN 90 DAYS	HARDSHIP RISK
–£160	**–£405**	**–£771**	**96%**
Overdraft limit £500 · savings £300	likely –£549 to –£268 · High confidence (94%)	likely –£1,036 to –£544 · High confidence (91%)	NEEDS ATTENTION High confidence · £200 more savings → 93%

Your balance: last 3 months and next 12 months

Actual balance · Most likely forecast · Likely range (8 in 10 futures fall here) · Forecast without your life changes · Overdraft limit

How to read this: the dark line is what actually happened. The blue line is the most likely path from today; the shaded band shows where your balance lands in 8 out of 10 simulated futures. The wider the band, the less certain the forecast. Below £0 is expected around **08 November 2026**.

What's driving your risk

100% chance of going past your overdraft limit in the next 90 days

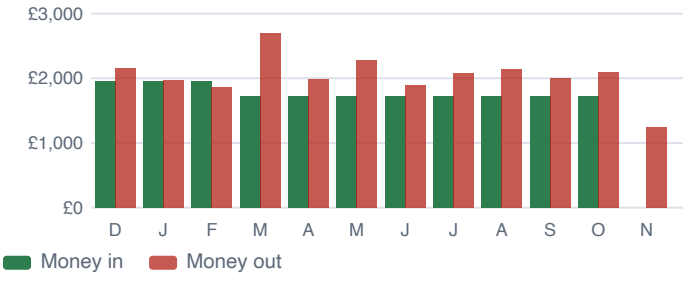

Savings would cover 0.1 months of spending

Income is 8% lower than the previous 6 months

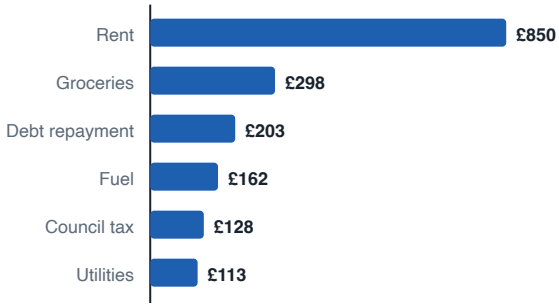

Planned life changes

- **New child** from 06 May 2027: £800 one-off, £450/month. Assumption: About £450 a month in extra costs plus £800 for essentials at the start.

Income vs spending, last 12 months

Where your money goes (per month)

COMMON CENTS · FINANCIAL FORECAST

What could happen, and what you can do

Jordan · 07 November 2026

Your alerts

RESILIENCE · HIGH CONFIDENCE

Move bills to just after payday

You could ask Black Horse Finance to move your £189 payment from the 3rd to the 26th, which lifts your lowest expected balance from -£1,493 to -£1,304. Asking Manchester City Council to move your £128 council tax from the 10th to the 26th lifts it further, to -£1,176.

Why am I seeing this? Your action plan tested these changes over the next 120 days. Both are easy steps, and each one moves a bill to the day after your £1,720 pay from ACME Logistics Ltd.

Try: Call Black Horse Finance this week and ask to move your payment date to the 26th.

RISK · HIGH CONFIDENCE

Your balance before payday needs attention

Your bills before 25 November add up to more than the money available, even with very little everyday spending. Your balance is expected to be about -£867 the day before your pay arrives, which is past your £500 overdraft limit.

Why am I seeing this? Your bill calendar shows Netflix on 8 Nov, Manchester City Council £128 on 10 Nov, Octopus Energy £118 on 12 Nov, Spotify on 15 Nov, EE £28 on 18 Nov and Klarna £25 on 21 Nov, with your pay due on 25 Nov.

Try: Talk to your bank or a free debt adviser such as StepChange or MoneyHelper now. They can help you with these bills.

OPPORTUNITY · MEDIUM CONFIDENCE

Check what support you could get

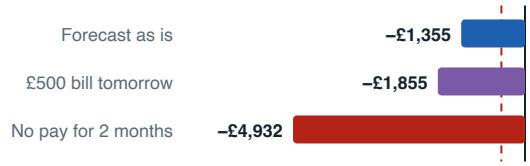

Your hours have been cut and a new child is on the way, so you may be able to claim support you don't get yet. This could include Child Benefit and Tax-Free Childcare.

Why am I seeing this? Your income is 8% lower than the previous 6 months, you spend more than you earn each month, and you told us about a new child.

Try: Use a free benefits calculator such as Turn2us or entitledto. If you'd find it useful, GamCare also offers free, confidential help with gambling spending.

Written by Claude from the forecast data above.

Stress tests: lowest expected balance

SCENARIO (NEXT 90 DAYS)	BELOW £0	PAST OVERDRAFT
Forecast as is	100%	100%
£500 bill tomorrow	100%	100%
No pay for 2 months	100%	100%

YOUR GOAL: MANAGE MONTHLY EXPENSES

Cutting going out and eating out by 20% frees £30 a month and lifts your lowest expected balance from -£1,355 to -£1,278.

Target: Cut going out and eating out by 20%

Your answers: Manage monthly expenses · Job security · New child · £500 bill: I couldn't cover it

How this forecast was made. We found your regular income and bills from payment patterns, then simulated 1,000 possible futures, drawing day-to-day spending from your own history with seasonal effects (for example Christmas) and inflation. Risk scores combine the forecast with trends in your overdraft use, savings, income and bills; every factor is listed above. Economic figures and life-event costs are estimates and are listed in the data.

Your plan

Jordan · 07 November 2026

Smallest changes with the biggest effect

1. **Ask Black Horse Finance to move your £189 payment from the 3rd to the 26th** (easy · lowest balance then –£1,304)
2. **Ask Manchester City Council to move your £128 payment from the 10th to the 26th** (easy · lowest balance then –£1,176)
3. **Ask Octopus Energy to move your £118 payment from the 12th to the 26th** (easy · lowest balance then –£1,052)
4. **Pause Spotify for a few months (£11.99 a month)** (easy · lowest balance then –£1,005)

NEXT 120 DAYS	NOW	WITH THE PLAN
Lowest expected balance	–£1,493	**–£856**
Days overdrawn (expected)	96	**93**
Chance of going past overdraft	100%	**99%**

Greedy search over 1,000 simulated futures: each round adds the change with the biggest risk reduction per unit of effort.

SAFE TO SPEND

£0 a day

Your bills before 25 Nov are more than the money available, even with very little everyday spending. Talking to your bank or a free debt adviser now is the best next step.

Next 30 days of bills and income

DATE	WHO	AMOUNT	BALANCE AFTER
Sun 08 Nov	Netflix	–£11	–£209
Tue 10 Nov	Manchester City Council	–£128	–£377
Thu 12 Nov	Octopus Energy	–£118	–£525
Sun 15 Nov	Spotify	–£12	–£620
Wed 18 Nov	EE	–£28	–£713
Sat 21 Nov	Klarna	–£25	–£787
Wed 25 Nov	ACME Logistics Ltd	+£1,720	£824
Thu 26 Nov	Transfer from Savings	+£150	£969

Spending patterns we noticed

- 5 days in the last 6 months had unusually high non-essential spending (£390 in total).
- You're paying about £46 a month to buy-now-pay-later providers. These count as debt.
- About £35 a month goes to gambling sites. If you'd like, there are free tools that can help you stay in control.

For your stage of life (family)

- Check you're claiming Child Benefit and, if you work, Tax-Free Childcare.
- Aim for a bigger buffer than average: families face more surprise costs.

Support you asked for

Money makes me anxious (you asked)

We lead with what's going well, show one thing at a time, and avoid alarming language.

- Money and Mental Health Policy Institute: practical guides on managing money and mental health
- Mind: mental health information and support
- You can ask your bank to record that you'd like extra support

I find it hard to keep track of bills (you asked)

We list every bill for the next 30 days with the date and your expected balance after it.

- Ask providers to move payment dates to just after payday (see your action plan)

I want help with gambling (we noticed gambling payments)

We show your gambling spend clearly and point you to free tools.

- GamCare: free, confidential support for anyone affected by gambling
- GAMSTOP: free self-exclusion from UK online gambling sites
- Turn on your bank's gambling block, if your bank offers one

Support preferences only change how information is shown. They are never used in any score or shared.

HOW ACCURATE IS THIS FORECAST?

Tested on 3 past periods: average error £30 vs £229 for the best simple guess (87% better). The 80% range contained the real balance 99% of the time.

Risk model: gradient-boosted trees trained on 1,744 simulated customers. On 582 customers it never saw, it ranked risk correctly 95% of the time (ROC-AUC 0.949), compared with 88% for a hand-written formula. **Forecast ranges** are checked by a learned model with conformal calibration: on unseen customers the 90-day 80% range held the real balance 80% of the time (simulation alone: 49%).

We re-ran the model as if it were 60, 90, 120 days ago and compared it with what really happened. Measured on the demo data, which is synthetic.
